Bursting with high-speed arcade action, **Emlyn Hughes International Soccer** offers the most realistic gameplay yet.

You can almost feel the crowd pressing you forward as the goalkeeper tips a dipping shot over the bar! Stand back, and for a moment you'll believe you are watching a real match on TV!

It's amazing that so many features have been packed into one program. Diving headers and sliding tackles, even barging and side-stepping, plus free-kicks, throw-ons, goalkicks, corners and penalties!

But that's not all — **Emlyn Hughes International Soccer** allows you to enter your own teams of star players, set their skill levels individually, and manage them through the season. The fitness of each player is constantly changing, so you may have difficult selection problems — would *you* take a risk and put your star player in the team if he wasn't fully fit?

One or two can play, or you can watch two computer teams battle it out. And to create those really classy moves, why not try two players against the computer?

Excellent graphics... highly enjoyable gameplay... a marvellous way to play football - 91%
